

• In addition to routine checks for each use, PPE should regularly undergo a detailed inspection by a competent person. Petzl recommends an inspection every 12 months and after any exceptional event in the life of the product.
 • PPE inspection should be conducted with the manufacturer's Instructions for Use.
 Download the instructions at PETZL.COM.

Manufacturer: Petzl, ZI Cidex 105A - 38920 Crolles - France

				N/A
Good condition (G)	To monitor (TM)	To repair (TR)	Do not use, retire (R)	Not applicable

1. Known product history

Usage conditions or exceptional event during use (examples: fall or fall arrest, use or storage at extreme temperatures, modification outside manufacturer's facilities...):

2. Preliminary observations

- Verify the presence and legibility of the serial number and the CE mark.
- Verify that the product lifetime has not been exceeded.
- Compare with a new device to verify there are no modifications or missing elements.

3. Checking the condition of the strap

- Check the condition of the strap along its entire length: look for cuts, wear and damage due to use, to heat, to chemicals... Be particularly careful to check for cut fibers.
- Check the condition of the safety stitching on both sides. Look for any threads that are loose, worn, or cut.

4. Checking the attachment points and adjustment buckle (depending on the model)

- Check the condition of the attachment points and of the adjustment buckle: marks, cracks, wear, deformation, corrosion...
- Verify that the adjustment buckle operates properly.

Comments (detail here any defects found on the product and accomplished tasks)

VERDICT

	Product fit to remain in service
	Product unfit to remain in service
